

WCTP 2021

Workshop on Computation: Theory and Practice

November 27, 2021

Online Conference

Computation should be a good blend of theory and practice. Researchers in the field should create algorithms to address real world problems putting equal weight to analysis and implementation. Experimentation and simulation can be viewed as yielding to refined theories or improved applications.

WCTP 2021 is the eleventh workshop organized by the Tokyo Institute of Technology, The Institute of Scientific and Industrial Research-Osaka University, University of the Philippines-Diliman and De La Salle University-Manila that is devoted to theoretical and practical approaches to computation. It aims to present the latest developments by theoreticians and practitioners in academe and industry working to address computational problems that can directly impact the way we live in society.

WCTP 2021 will feature work-in-progress presentations of prominent researchers selected by members of its Program Committee who come from highly distinguished institutions in Japan and the Philippines. The presentation at the workshop will certainly provide high quality comments and discussion that future research can benefit from.

Call for Presentations

The WCTP 2021 program will consist of work-in-progress research presentations selected by the Program Committee. All sessions will be devoted to original research. Major topics of the workshop include, but are not limited to, the followings:

Category 1: Theoretical Approaches to Computations

Logical approach to software and hardware verification:

model checking, theorem proving, etc.

Formal approaches to computation:

typed and untyped lambda calculi, process calculi, petri net, object calculi, etc

Formal frameworks for bioinformatics:

P system, ambient calculus, etc.

Category 2: Practical Approaches to Computation

Modeling of user's emotion, mood, intention, motion, posture and/or gesture

User behavior and/or activity modeling

Social signal processing

Ambient intelligence

Intelligent user interfaces

Category 3: Computation for Real World Applications

Information Technology in Education

Information Technology in Medical Fields

Submission

Submissions related to the topics of the workshop are very much welcome. Submissions that relate results from other areas to the workshop topics are also encouraged. Presentations should be submitted through the [EasyChair system](https://easychair.org/conferences/?conf=wctp2021) <https://easychair.org/conferences/?conf=wctp2021>. A title and an abstract of the presentation should be submitted to the EasyChair. The presentation time will be about 15 to 25 minutes.

Online Poster Session for Students.

We are also planning an online poster session for students, using the oVice system. The session submission page will also be provided in the EasyChair system.

Program Co-chair

Jaime Caro (University of the Philippines - Diliman), Merlin Suarez (De La Salle University), Masayuki Numao (Osaka University), and Shin-ya Nishizaki (Tokyo Institute of Technology).
